

Final Presentation

Team 1:

Thanh Tam Nguyen, Sjaan Arnsfeld

Fabian Stemmer, Christoph Kecht

Vishesh Mathur, Kirill Kldiashvili

Structure

1. Overview
2. Purchase Ticket
3. Create Timetable
4. New Product Offer
5. Purchase Item
6. SQL-Interface & Reset Database

Overview

- Logo
- Git for teamwork purpose and communication
- Issues
 - example: checking passwords and correlating username
- Additional tasks
 - added more entries in table timetable_entry
- Bootstrap Framework
 - mobile phones
 - smaller/bigger screen sizes

Query for SQL Interface: How much money have the bands earned with their merchandise?

```
SELECT prov.name, SUM(s.quantity * prod.price) AS  
total  
FROM sale s, product prod, provider prov, band b  
WHERE s.product_id = prod.product_id  
AND prod.provider_id = prov.provider_id  
AND prov.provider_id = b.provider_id  
GROUP BY prov.name;
```
